

### Cellular Application

- Complete control over your farm via a mobile phone
- Consistent look & feel with other Munters applications, including the PC & Tablet View and Platinum Touch
- Supports push notifications
- Single user can control multiple farms

### Web Application

- Full control over your farms' controllers
- Overview of houses' activities
- Easy comparison of houses' main performance parameters

### Alarms & Tests

- Communicator 2.0's alarm software is feature rich, simple to use
- Built-in diagnostic package aids tech support if issues come up

## Communication Package

Munters supplies a variety of communication packages designed to meet your specific requirement - complete easy remote access to your farm. All of these packages enable simple internet access to your farms, from any location, from any device.

Munters **Comm-Box** supplies complete web access to your controllers from any device with access to the Cloud, including mobile devices. The **Communicator** features a complete alarm and events package, keeping you informed of any issue that comes up, in real time. Together, these units provide a comprehensive service package.

As an option, the Comm-Box can be installed as a standalone device.

The **Communicator 2.0** provides an extensive alarm package along with remote access to your farms' controllers via the web. In addition to the alarm package, Communicator 2.0 features a battery power backup system, guaranteeing continuity of service in the event of a power outage.
