

Benefits

- Modular architecture enables a high level of flexibility in system design
- Improved software capabilities support an unlimited number of devices and scales
- Simple software upgrade reduces maintenance time
- Programming accessories from the Platinum Pro simplifies accessory configuration

Features

- Access via the Web or Cloud
- Real time alarms via smartphone or Web
- Supports a large number of input/outputs both and analog digital
- A single controller supports up to 200 2HP heavy duty relays (including Expansion units)
- Smart On/Off/Auto override switches
- 16 independent heat zones
- Precision fogger and evaporative cooling system
- Failsafe emergency relay
- SD card and ARM CPU
- Multilanguage support

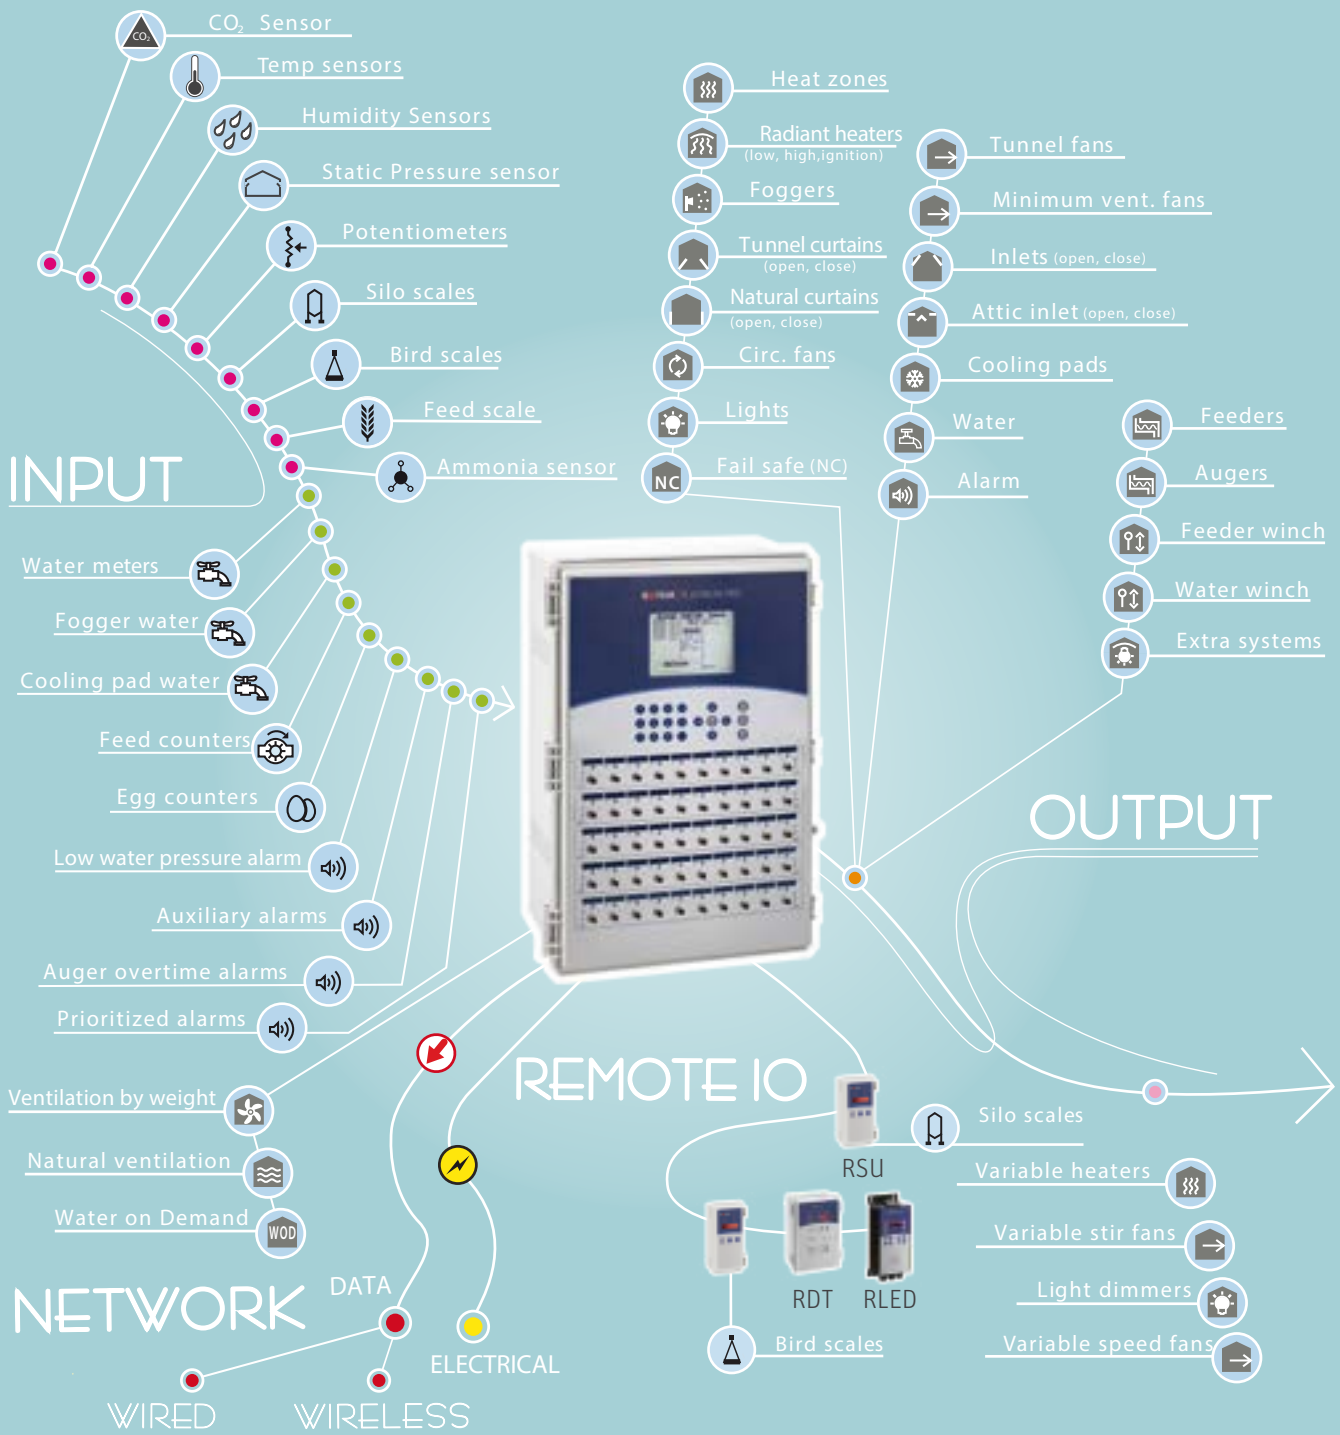

Platinum Pro

Climate Control Taken to a New Level

The Rotem Platinum Pro, the Next Generation in Climate Control, provides poultry (broiler, layer, & breeder) and livestock farmers with vastly expanded capabilities. Besides providing complete control over all aspects of house management (including climate control, feed & water management, and more), the Platinum Pro's upgraded functionality extends this control to new levels. Platinum Pro's upgraded functionality is suitable for any structure, from standard to mega houses.

Platinum Pro accomplishes this by supporting management over multiple expansion units, allowing simple, centralized management over even the largest operations.
