

ACHIEVE OPTIMAL FLOCK MANAGEMENT

Amino by MTech Systems

Take control of your data with Amino, a powerful and simple web-based system for small and medium producers. Capture and organize daily activities for full traceability of your production chain, feed orders, animal health, inventory, mortality and more. Amino allows you to easily generate reports and access accurate production forecasts, bringing your business to a new level of productivity.

Feed Management Options

The FeedCast Inventory Control System is a wireless, solar powered solution that monitors feed bin inventory and delivers precise data and actionable metrics to help more efficiently allocate resources in the feed supply chain.

The Rotem Feed Bin Load Cell is installed under each silo leg and connects to your controller. Its high quality design ensures that it provides accurate data even under rigorous field conditions.

Bird Scale System

Know how your birds stack up with scales and scale sets. Collect weight, daily gain, uniformity and more on any bird. Accurately weigh every bird using the RBS-2 Chicken Weighing Platform, or rely on the rigid construction of the aluminum RBS-2H broiler hanging scale and its 110-pound weighing capacity.

Smart House by Diversified and MTech

The Smart House is a range of products used in conjunction with MTech software that help achieve optimal flock management. Connect your water meter, temperature and humidity sensors, feed inventory and bird scale to your Rotem controller and communication package with Amino software to have all the necessary tools for intelligent data collection and management.
