Water on Demand Pro

Water on Demand PRO Precise Day Round Water Consumption

A Revolutionary Solution for optimal Water Management.

PLASSON'S Water on Demand Pro is an innovative system that allows you to easily control and precisely manage the water pressure in all drinking lines of your house according to the birds' changing demands during a daily 24-hour cycle and through the grow-out cycle.

Morning

Benefits

- Preset the pressures for the entire grow-out cycle
- Program and monitor the pressure of the nipples lines from the controller on site or remotely from any mobile device
- Maximizes bird performance with optimal water supply
- Maintains a drier floor
- Saves labor costs
- Successfully works with retrofitted PLASSON Line Headers
- Ideal water management tool together with PLASSON'S Automatic Flushing System Kit
